Summary

A full-stack developer with 7 years of experience across various SAP and Open Source technologies. I have worked on multiple product implementations from scratch and I am well-versed with SAP's agile-based development methodologies.

I have experience in product development and have a sounding experience of **ABAP, OO ABAP, NetWeaver Gateway, UI5/Fiori, SAP BTP, ABAP CDS, AMDP, BOPF, MTA, CAPM, Qualtrics, Coveo, Azure DevOps and Blockchain technologies including HyperLedger, Multichain, and Quorum.**

I am also well versed in the fundamentals of JavaScript, CSS, HTML5, Node.js, and XML using SAP WEB IDE and SAP BAS.

Proficiency

- Hands-on knowledge of ABAP and OOABAP. Have worked upon Data Dictionary objects creation, Report/FM/Class development & RFC Implementation
- Good knowledge of NetWeaver Gateway and OData. Have developed various types of OData and have deployed and registered the services on gateway
- Experience in ABAP CDS development. Have developed BOPF and AMDP based CDS services. Created Smart Control based Applications based on CDS Annotations and associations
- Experience in UI5/Fiori Application development. Extensively used SAP BTP, BAS and Web IDE to develop custom UI5 applications
- Hands-on Experience in Coveo solution including Atomic/Headless library. Have worked on integration projects with UI5 and Coveo.
- Very Good Knowledge of Multi-Target Application Development. Developed and deployed Application using node.js based MTA.
- Worked Extensively on SAP Blockchain Services. Developed and Deployed Blockchain Applications using three different approaches i.e. ABAP, UI5, and MTA

Project Experience

Project: Business Traveler Compliance

Client: SAP SE

Role: MTA, CAPM, Azure DevOps, and SAP UI5/Fiori developer.

Key Responsibilities:

- End to End Creation of UI5 App in MTA and then migrating the same in CAPM
- Azure DevOps CI/CD Pipeline creation, Qualtrics, Microsoft Graph API and DocuSign Integration
- Coveo Search Integration and Sync with OData

Project: eDocument on Blockchain

Client: SAP India

Role: OOABAP, ODATA, Blockchain, MTA, Node.js and SAP UI5 developer.

Key Responsibilities:

- Blockchain (Quorum/Multichain) Integration with MTA
 - Integration and API calls to SAP Blockchain Enablement Services via ABAP Classes
 - Developed Consumption, Interface and Basic views for the Application Created App
 - Used these CDS Views with AMDP and smart controls in SAP Web IDE.
 - Used SHA256 Encryption for eDocuments
 - Extracted Hashed Data from blockchain and Implemented Comparisons in the OData methods
-

Project: DCD & DCD AI

Client: SAP India

Role: OOABAP, ODATA, Coveo and SAP UI5 developer.

Key Responsibilities:

- Construction of Entity Relationship for the Database
 - Smart control-based Frontend Development
 - Integration and API calls to different systems like CRM and CMS from ERP system
 - Extracted data from three different sources i.e. ERP, CRM and Cloud for DCD
 - Application Worked on both backend and frontend of the Applications
Used Function Imports, Batch operations and MIME services of the OData
 - Integrated Recommendations and personalization of SAP Commerce storefront using Coveo.
-

Project: Non-Disclosure Agreement (NDA) Project

Client: SAP Germany

Role: OOABAP, ODATA and SAP UI5 developer.

Key Responsibilities:

- Developed the UI from Scratch
- Conversion of old reports in FM
- Background Job creation for logs
- External Product DocuSign Integration
- Database creation and manipulation for log and status maintenance
- OData creation to integrate the service with frontend.
- CDS creation with AMDP to handle smart controls i.e. Smart table and smart filter
- Service creation and whitelisting
- Backend and Frontend Testing
